Professional Summary

Software Developer with a BSc in Computer Science and practical experience building AI-powered applications, automation tools, and full-stack web solutions. Strong foundation in Python, JavaScript, React, Django, SQL, REST APIs, OpenAI API, Git/GitHub, and Agile software delivery.

Core Skills

Python, Java, JavaScript, C#, SQL, HTML5, CSS3, React, Django, Flask, Streamlit, REST APIs, OpenAI API, Git/GitHub, Linux, OOP, Data Structures, Algorithms, Software Testing, Debugging, Automation, AI/ML, NumPy, Pandas, Matplotlib, Agile

Professional Experience

Software Developer Intern – SISOL Connex

Jan 2026 – Mar 2026

- Developed Python automation tools to streamline repetitive tasks and improve workflow efficiency.
- Built an AI-powered CV generator using Python, Streamlit, OpenAI API, and NLP techniques.
- Integrated REST APIs and improved application performance through testing and debugging.
- Collaborated in Git-based Agile workflows to deliver software improvements efficiently.

AI Software Developer Learnership – Initium Venture Solutions

Mar 2025 – Feb 2026

- Developed AI and ML solutions for real business challenges using practical software engineering methods.
- Applied core software development principles in real-world projects across AI, automation, and problem solving.

Education

BSc Computer Science – University of the Western Cape (2020 – 2024)

Projects

- AI-Powered CV Generator – Python, Streamlit, OpenAI API
- Financial Option Pricing System – Python, NumPy, Matplotlib
- IoT Buzzer Interface – Python, Raspberry Pi
- Moments With Us – HTML, CSS, JavaScript
