PROFILE

I'm a Software Developer and Computer Science graduate with a solid foundation in Python, full-stack development, and artificial intelligence. I've gained hands-on industry experience through a software development internship, where I worked on real-world systems, contributing to development, testing, and overall system improvement.

I enjoy building practical, data-driven solutions from financial modeling tools to interactive web applications and simulation systems. I'm especially interested in AI and using technology to solve real business problems, with a strong focus on writing clean, scalable, and efficient code.

.

TECHNICAL SKILLS

Languages: Python, Java, C#, SQL, JavaScript, HTML5, CSS3
Frameworks & Tools: Git, GitHub, Pandas, NumPy, Matplotlib
Core Competencies: OOP, Data Structures & Algorithms, System Design, Software Testing, Database Systems
Interests: AI, Machine Learning, Backend Development, Web Development, Cybersecurity

---

PROFESSIONAL EXPERIENCE

Software Developer Intern

SISOL Connex | Jan 2026 – Mar 2026 **Key**

Responsibilities

- Assisted in the development and testing of software applications in an enterprise environment

• Developed and maintained Python-based scripts and automation tools
• Supported development of full-stack applications and backend services

• Participated in debugging, testing, and performance improvement of systems
• Collaborated using Git and version control workflows
• Contributed to AI-based and automation-focused solutions **Key Achievements**

• Contributed to software improvements enhancing system performance
• Strengthened practical experience in Python development and testing • Gained exposure to enterprise-level software development practices

AI Software Developer Learnership

Initium Venture Solutions | Mar 2025 – Feb 2026

- Worked on AI/ML projects, tackling real-world problem-solving challenges.
- Strengthening software design and development skills through hands-on experience.

EDUCATION

Bachelor of Science – Computer Science
University of the Western Cape
2020 – 2024

Relevant Coursework

- Software Development
- Algorithms and Data Structures
- Database Systems
- Mathematical Modeling
- Applied Mathematics
- Financially Mathematics

PROJECTS

Financial Modeling System – European Option Pricing

Developed a Python-based financial analysis system comparing pricing models

Technologies: Python, NumPy, Matplotlib

- Implemented Black-Scholes model
- Built Binomial Tree algorithm for option pricing
- Visualized financial results using graphs and simulations

Project Link
https://raludzingana98.github.io/Comparison-of-Option-Pricing-Techniques

IoT Raspberry Pi System – Buzzer Controller

- Built a network-controlled Raspberry Pi system
- Enabled remote control of buzzers for quiz systems
- Demonstrated hardware-software integration

Interactive Web Application – "Moments with Us"

Technologies: HTML, CSS, JavaScript

- Built a fully responsive web application
- Implemented dynamic UI features including animations and DOM manipulation
- Deployed using GitHub Pages Project Link https://raludzingana98.github.io/romantic-website/

GITHUB PORTFOLIO

GitHub: https://github.com/Raludzingana98

Key Projects

- AI CV Structuring System (Python, OpenAI API)
- Weather Forecast Web App (JavaScript API)
- Currency Converter Application
- Option Pricing Financial Mode

LANGUAGES

English – Professional
Tshivenda – Native
Xitsonga – Fluent Sepedi –
Conversational isiZulu –
Conversational isiXhosa –
Conversational

STRENGTHS

- Strong analytical and problem-solving skills
- Effective team collaborator with clear communication
- Passionate about continuous learning and emerging technologies
